POLYCARBONATE

DRINKWARE | [BARTUFF.COM](https://bartuff.com)

**Bartuff®**  
**Polycarbonate**  
**Drinkware is designed**  
**and manufactured to**  
**specifications**  
**ensuring everything**  
**we produce is:**

- **Quality Guaranteed** - 100% Top-Grade Polycarbonate
- **Safe and Economical** - Virtually Unbreakable – Shatter, Chip, Crack and Scratch Resistant
- **Durable and Easy to Clean** - Dishwasher Safe and Microwave Safe
- **Environmentally Friendly** - Reusable and Recyclable
- **Optimal Value For Money** Through Sleek, Clever and Durable Design

**What is Polycarbonate,**  
**and what it can do for**  
**you:**

Polycarbonate is a durable plastic material known for its **high impact resistance**. Commonly used in safety eyewear, bullet proof safety screens and riot shields, it is often mistaken for cheaper plastics including acrylic, SAN, polystyrene etc. that do not have the strength and durability of polycarbonate.

All Bartuff® Polycarbonate Drinkware is made from **100% pure top-grade polycarbonate** and is safe for use in temperatures between -40°C to 130°C, making our drinkware ideal for hot and cold beverages. Our drinkware is **tested to be food safe** complying with European Directive 2002/72/EC and its amended 2007/19/EC and US FDA 21 CFR part 177.1580.

## Why Design Should Be Important to You

At Bartuff®, we believe that well designed Polycarbonate Drinkware **enhances the drinking experience** and **maximizes your value for money**. All our drinkware is designed to be practical, durable, and stackable where possible ensuring they are **long lasting, easy to store, collect, and clean**.

Bartuff® Polycarbonate Drinkware has been custom designed to meet all your requirements from nucleated beer glasses to ensure beers are kept fresh, custom designed stacking ribs to avoid jamming and solid flat bases or channels to allow for water drainage during dishwashing. These are just some of our design considerations that make Bartuff® Polycarbonate Drinkware stand out from the rest.

**With a focus on value for money**, we ensure our drinkware is heavy enough so that it doesn't feel disposable, and not so heavy that they are overly expensive to replace when required.

## What about the environment?

All our Polycarbonate Drinkware is recyclable under Plastic Identification Code "7".

As Polycarbonate is virtually unbreakable, reusable, and recyclable, it is considered more environmentally friendly than other drinkware alternatives that are disposable or require constant replacing due to breakages.

Bartuff® supports Carbon Neutral through their Plant-a-Tree Program, and now we provide our customers with the opportunity to help the environment with each purchase through the Plant-a-Tree Program.

## Getting the most out of your Bartuff® Polycarbonate Drinkware

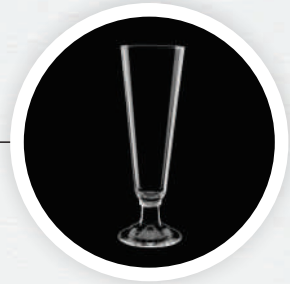

All our drinkware is shatter, chip, crack and scratch resistant. For best results, wash in a commercial dishwasher or glass washer using warm water and an oxy-based detergent. Avoid harsh caustic soda based detergents and do not use abrasive brushes and steel wool as these will scratch any plastic.

# Beer Glasses

---

500mL Certified EU Beer Glass  
(BTB500EU)

440mL Pilsner Beer Glass  
(BTB439P)

(L to R)
