

Established 1880

Food cutting surfaces for solutions around the world

The leading manufacturer of professional food cutting and serving surfaces combining knowledge, commitment and customer service, at the cutting edge of our industry.

Five different shapes available.

ECS Wood Fibre is a natural product and is NSF and FSC approved.

PRO-DUET

NEW RANGE OF AMERICAN ASH & ECS WOOD FIBRE, FOOD SERVING BOARDS

A completely new way of serving food to the table, ECS wood fibre slate-like board lovingly crafted and recessed into the warmth and charisma of luxurious American Ash.

This practical solution allows the super eco friendly ECS Wood Fibre board to be removed for daily cleaning (dishwasher safe) whilst the Ash wood board just needs the occasional wipe. ECS wood fibre is heat resistant to 178°C too.

For that little extra personal touch and a small additional charge, each board can be engraved with your logo or name permanently in the middle, corner or handle. Every board includes a juice groove, but also a circular recess for your sauce pot or ramekin can be machined at no extra cost. The complete solution!
